Gentlemen:

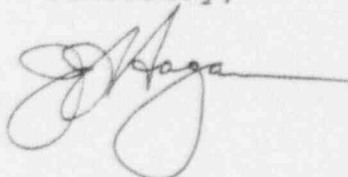

SUPPLEMENT TO REQUEST FOR AMENDMENT  
HOPE CREEK GENERATING STATION  
FACILITY OPERATING LICENSE NPF-57  
DOCKET NO. 50-354

Public Service Electric and Gas Company (PSE&G) hereby submits two minor corrections to our previous request for amendment to the Hope Creek Generating Station Technical Specifications (TS), contained in our letter, NLR-N93100, dated October 26, 1993.

The corrections do not significantly change the substance of the requested amendment and have no impact on our analyses supporting a no significant hazards consideration determination. They both involve a change to the INSERTS FOR PROPOSED CHANGES page in Attachment 2 to our amendment request. One typographical correction changes a TS Table 3.3.7.5-1 ACTION 80 reference from Specification 6.9.2.a to read Specification 6.9.2. The other change, to the same Table, is to retract an incorrectly proposed 30 day notification, leaving the current 14 day requirement in ACTION 81. Revised copies of the affected pages are attached.

Should you have any questions regarding this submittal, we will be pleased to discuss them with you.

Sincerely,

210080
