NPF-7

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNITS 1 and 2
REQUEST TO CHANGE TECHNICAL SPECIFICATIONS

Pursuant to 10 CFR 50.90, Virginia Electric and Power Company requests an amendment in the form of changes to Technical Specification 6.3 "Facility Staff Qualifications" of Operating License Nos. NPF-4 and NPF-7 for North Anna Power Station Units 1 and 2, respectively. These changes provide for and document exceptions to ANS 3.1-(12/79 Draft) in the North Anna station staff organization and qualification requirements regarding the position of Operations Manager as described in the standard.

In addition, changes are proposed to Technical Specifications 6.2 and 6.4 to revise the title of the "Nuclear Safety Engineering" group to "Station Nuclear Safety." This is only an administrative change to reflect a change in the title of the group.

The proposed changes (in the current Technical Specification format) are provided in Attachment 1 and in the MERITS TS format in Attachment 2. A discussion of the proposed changes is provided in Attachment 3.

This request has been reviewed and approved by the Station Nuclear Safety and Operating Committee and the Management Safety Review Committee. It has been determined that the proposed changes do not involve an unreviewed safety question as defined in 10 CFR 50.59 or a significant hazards consideration as defined in 10 CFR 50.92. The basis for our no significant hazards determination is provided in Attachment 3.

A review of the affected procedures indicate that a significant number of procedures will require modification to reflect the proposed Technical Specification staff organizational changes. Therefore, we request that this license amendment should become effective at time of issuance with full implementation not later than 45 days from date of issuance. This will allow us sufficient time to accomplish the required administrative and procedural changes.

If you have any questions or require additional information, please contact us.

Very truly yours,

W. L. Stewart
Senior Vice President - Nuclear
