Gentlemen:

VOGTLE ELECTRIC GENERATING PLANT  
CORE OPERATING LIMITS REPORT

Amendments 32 and 12 to the Operating Licenses for Vogtle Electric Generating Plant (VEGP), Units 1 and 2 respectively, were issued by the NRC on July 30, 1990. The amendments remove limits associated with reactor physics that are fuel cycle specific and place them in a separate Core Operating Limits Report (COLR).

Attached to this letter are the Core Operating Limits Reports for Cycle 3 of VEGP Unit 1 and Cycle 1 of VEGP Unit 2. The values of the reactor physics limits contained in these reports are the same as those in effect at the time of issuance of License Amendments 32 and 12.

Sincerely,

  
W. G. Hairston, III
