DUKE POWER COMPANY

MCGUIRE NUCLEAR STATION

PROCESS CONTROL PROGRAM

1.0 PURPOSE

The purpose of the McGuire Nuclear Station Process Control Program is to ensure all requirements of the DPC Corporate Process Control Program have been met for each container of solidified radioactive or mixed waste and dewatered radioactive waste shipped for burial at a licensed burial facility. The PCP is applicable only to the solification or dewatering of liquid or wet solid radioactive waste.

2.0 COMPOSITION

2.1 The McGuire Nuclear Station PROCESS CONTROL PROGRAM shall consist of:

2.1.1 The Duke Power Company Corporate Process Control Program.

2.1.2 A list of all station-specific procedures that implement the requirements of the Corporate Process Control Program.

2.1.3 McGuire Nuclear Station diagrams, drawings or drawing numbers showing all interfaces between MNS radwaste systems and solidifications and dewatering equipment.

2.1.4 Documentation of NRC approval of the initial McGuire Nuclear Station Process Control Program.

2.1.5 Documentation of Technical System Manager Nuclear Chemistry, MNS Technical Services Superintendent and MNS Station Manager approval of the changes to the Corporate Process Control Program.

2.1.6 Documentation that all changes to the Corporate and/or MNS Process Control Program were sent to the NRC in the Semi-Annual Radioactive Effluent Report.

3.0 EXCEPTIONS

3.1 The McGuire Nuclear Station Process Control Program takes the following exceptions with DPC Corporate Process Control Program:

3.1.1 For Corporate PCP Section 3.1.3, station review and station Technical Services Superintendent approval are not required. Corporate review and approval of vendor solidification and dewatering services are sufficient.
