Docket No. 50/395
Operating License No. NPF-12
Amendment to Technical Specification
Change/Clarification of
Member/Alternate Ratio

Gentlemen:

On July 18, 1990, South Carolina Electric and Gas Company (SCE&G) submitted a Technical Specification change to the Nuclear Regulatory Commission (NRC). The change request was proposed to delete Plant Safety Review Committee (PSRC) chairman and member titles from Technical Specification 6.5 "Administrative Controls/Review and Audit."

After a conversation on July 25, 1990, with Jack Hayes, Project Manager with the NRC, an amendment to this technical specification has been proposed. The proposed change is intended to clarify that the majority of voting members in any PSRC meeting shall be appointed members and not alternates. Alternates, including the chairman's alternate, who are participating in voting shall hold a minority vote in all PSRC meetings.

The change request is contained in Attachment 1 of this letter.

Attachment 1: The Technical Specification pages with original changes and requested amendment indicated.

The change to Technical Specification 6.5 has been reviewed and approved by the Plant Safety Review Committee and the Nuclear Safety Review Committee. Since the proposed amendment to this Technical Specification change is administrative and is intended to provide clarity, the supporting Safety Evaluation and No Significant Hazards Determinations for the change to Technical Specification 6.5, dated July 18, 1990, is applicable. Therefore, SCE&G requests Nuclear Regulatory Commission review and approval of this amendment by November 1, 1990.
