Construction Materials Testing Group, LLC

816-500-8759

## SUBJECT

The RSO for Construction Materials Testing Group, LLC, (CMTG) informed the inspector that CMTG is an NRC licensee and the NRC License's Docket Number is 030-31561, and the inspector verified that information. The RSO called the inspector because the licensee obtained two Troxler Model 3440 Plus portable gauges from O'Donnell and Sons Construction a few days ago from 2/27/2020. The RSO said O'Donnell and Sons Construction has a license for the State of Kansas' Radiation Control Program for use of portable gauges.

The inspector provided contact information for the RSO so that he can initiate the process of amending the NRC license to add the two Troxler Model 3440 Plus portable gauges (i.e., contact a Region III license reviewer to amend the license).
