

UNITED STATES  
NUCLEAR REGULATORY COMMISSION

REGION III  
2443 WARRENVILLE RD. STE 210  
LISLE, IL 60532-4352

**FEB 27 2020**

Alexander Georgiades, M.S.  
Radiation Safety Officer  
Radiology Dept.  
2400 E. 17<sup>th</sup> St.  
Columbus, IN 47201

Dear Mr. Georgiades:

Enclosed is Amendment No. 59 to your NRC Material License No. 13-01631-05 in accordance with your request.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

In this amendment we changed the Radiation Safety Officer (RSO) to you. However, your letter dated December 5, 2019, failed to provide us with your telephone number, fax number and email address.

In your next amendment request, please be sure to include this information so we can complete our records and contact information for you.

In addition, we noted that two complete copies of your letters dated December 5, 2019, and January 13, 2020 (two separate letters) were sent to us.

Please note that we only require one complete copy of your correspondence to us, never two copies.

Further, you may make more than one amendment request in a single letter to us; they need not be separate.

The January 13, 2020, letter concerning Dr. Neyman was attached to the second copy of the January 13, 2020, letter concerning Dr. Dwenger and both copies of both letters bore the same date and were captured under one accession number in our official agency records electronic database.

It would be best, going forward, to combine such requests into one letter with one date and only send us one complete copy. You do not need to do anything further for the amendment requests completed at this time.

If you have any specific questions concerning this letter or the information above, please contact me at either (630) 829-9841 or (800) 522-3025, ext. 9841.

The enclosed license document contains sensitive security-related information.  
When separated from this cover letter, this letter is uncontrolled.

A. Georgiades

My fax number is 630-515-1078. My email address is colleen.casey@nrc.gov.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

Pursuant to NRC's RIS 2005-31 and in accordance with 10 CFR 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

A. Georgiades
