

Feb. 26, 2020

Dear Secretary.

Please allow the N.R.C. Meeting about decommissioning Indian Point to take place at the County Center in White Plains, New York.

We citizens that live and work within the plants geographic area need to have direct input in the outcome of the decommissioning process.

There are radioactive leaks, fuel rods in water pools not casks, there are gas pipelines all around the facility and many complex problems.

Holtec is not a reliable company and this Nuclear Facility deserves very careful attention.

As a big first step allow the meetings to occur in Westchester as this county is where the center of activity will happen.
