- Provides appropriated amount; approximates amount for fee recovery; and approximates the “Net Appropriation” amount not recovered through fees.
- Specifically excludes certain activities from fee recovery.
- Authorizes an amount of carryover funds from prior year for current year use.

- **Nuclear Energy Innovation & Modernization Act (NEIMA) of 2018:**

- Effective FY 2021 and thereafter; repeals OBRA-90.
- Regulations promulgated under 10 CFR Part 171.
- Limits power reactor annual fees at the FY 2015 annual fee amount as adjusted each year thereafter for inflation.

Nuclear Energy Innovation and Modernization Act (NEIMA)

Jason Shay, Director

Office of the Chief Financial Officer
Division of Budget

NEIMA

On January 14, 2019, the Nuclear Energy Innovation and Modernization Act or NEIMA was signed into law. NEIMA impacts the following areas in the NRC's Congressional Budget Justification (**effective FY 2021**):

- **Corporate Support** – NEIMA caps the NRC's corporate support costs at 30 percent of the annual budget request for FY 2021, stepping down to 28 percent in FY 2025 and beyond, to the maximum extent practicable.
- **Operating Power Reactors Annual Fee** – NEIMA caps the operating power reactor licensee annual fee to the amount established in the FY 2015 final fee rule, adjusted for inflation, to the maximum extent practicable.
- **Requested Activities** – NEIMA requires anticipated expenditures for "requested activities of the Commission" to be identified in the annual budget justification.
- **Accurate Invoicing** – NEIMA requires the appropriate review and approval prior to issuance of invoices; the development and implementation of processes to audit invoices to ensure accuracy, transparency, and fairness, and the modification of regulations to ensure fair and appropriate processes to provide licensees and applicants an opportunity to efficiently dispute or otherwise seek correction of errors in invoices for those fees.

Corporate Support

Corporate Support Budget FY 2014 - FY 2021

- Since FY 2014, the Corporate Support budget has decreased by approximately \$74.7 million, or approximately 22 percent.

³Assumes 93 operating power reactors

⁴Based on 1.5 percent Consumer Price Index increase per fiscal year.

Requested Activities

- NEIMA requires NRC to identify anticipated expenditures for “requested activities” in its annual budget justification
- NEIMA defines “requested activities” as the processing of applications for:
 - Design certifications or approvals
 - Licenses
 - Permits
 - License amendments
 - License renewals
 - Certificates of compliance
 - Power uprates
 - Any other activity requested by a licensee or applicant
- NEIMA limits movement of resources for requested activities during the year of execution, to the maximum extent practicable

NEIMA: Accurate Invoicing

- Ensure appropriate review and approval prior to the issuance of invoices
- Develop and implement processes to audit invoices to ensure accuracy, transparency, and fairness
- Modify regulations to ensure fair and appropriate processes to provide licensees and applicants an opportunity to efficiently dispute or otherwise seek review and correction of errors in invoices for those fees
