Subject: [External_Sender] Comments on 2-25-2020 Accident Tolerant Fuel Commission Meeting

Good morning,

I have just finished listening to the meeting on Accident Tolerant Fuel and have these observations.

I am very happy with what I heard. It seems that we have a group of people that are enthusiastic with their present work assignments, have an open mind to accepting information from others, (including international counterparts), receive /provide employee training, cross train, and seem to be prepared to identify changed conditions and react accordingly.

I also noticed, (about 1:33), the plan to work in parallel, which would be an overall time saver.

Credit needs to be extended to all the management of this activity responsible for this very favorable culture.

Thank you,

Tom Gurdziel
