General Comment

"The short and long-term impacts of a license transfer for decommissioning purposes will be very significant economically and environmentally to Westchester and the surrounding area. Thirty days is simply an insufficient public comment period for a proposal that is complicated, technical and will have repercussions for generations.

"The size and scope of the project, limited experience with decommissioning plants of this size, uncertainties regarding the transportation, storage, and disposal of radioactive material, impacts on the local economy, the level of financing required, and the myriad questions local communities have raised regarding a project of this magnitude more than justify the need for an extended public comment period and a local public hearing."
