## General Comment

My comment is in strong opposition to the transfer of license to Holtec for decommissioning Indian Point Nuclear Energy Plant.

I have 3 major and compelling reasons for this position:

- 1) Holtec has never decommissioned a nuclear plant!
- 2) Holtec cannot possibly be trusted! As we all know, they were suspended from work with the TVA for bribery and then lied about the suspension when they applied for a huge tax credit in the state of New Jersey.
- 3) Holtec is incompetent! According to the many whistleblowers who have reported safety problems on Holtec projects, they take dangerous short-cuts, and they do not take care to protect their employees.

The last thing we need in this highly delicate operation, in a hugely populated metropolitan area, is to set it up for failure with this unscrupulous company. It would pose a grossly unacceptable danger to us all.
