(215) 841-5001

December 17, 1982

Docket Nos. 50/277
50/278

Mr. Darrell G. Eisenhut
Director
Division of Licensing
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Dear Mr. Eisenhut:

A review of the Peach Bottom Atomic Power Station Units 2 and 3 Operating Licenses and Appendix A - Technical Specification has been performed in response to your letter dated October 30, 1982 (Generic Letter No. 82-23) which addressed "Inconsistency Between Requirements of 10CFR 73.40(d) and Standard Technical Specifications for Performing Audits of Safeguards Contingency Plan".

The Safeguards Contingency Plan for Peach Bottom Atomic Power Station adopted as Amendments No. 77 to Facility Operating License DPR-44 and No. 76 to Facility Operating License DPR-56, states, in Section 3.7 Program Review:

"The Safeguards Contingency Plan and implementing procedures shall be reviewed at least annually by an individual or individuals appointed by the Superintendent - Generation Division-Nuclear, Electric Production Department. The individual(s) shall not be on the staff of the Peach Bottom Atomic Power Station, Electric Production Department; or the Claims-Security Division, Legal Department."

5003

Darrell G. Eisenhut, Director

Page 2

Since including this requirement in Appendix A (Technical Specifications) to the Licenses would be redundant and serve no apparent additional purpose, we consider this matter closed. If there are any further questions or you require additional information, please do not hesitate to contact us.

Sincerely,

A handwritten signature in cursive script, likely belonging to Darrell G. Eisenhut, the Director mentioned in the header. The signature is fluid and stylized, with a prominent initial 'D'.
