**SUBJECT: KANSAS STATE UNIVERSITY – RESPONSE TO REQUEST FOR EXTENSION
OF TIME TO RESPOND TO REQUEST FOR ADDITIONAL INFORMATION
REGARDING LICENSE AMENDMENT REQUEST FOR THE USE OF 12 WEIGHT
PERCENT URANIUM FUEL ELEMENTS (EPID NO. L-2019-LLA-0092)**

Dear Dr. Cebula:

By letter dated April 9, 2012 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML12109A063), as supplemented by letter(s) dated April 28, 2014; October 5, 2016; May 2, 2017; September 23, 2017; and November 30, 2018 (ADAMS Accession Nos. ML16200A317, ML16291A498, ML17139C979, ML17319A305, and ML18347A209, respectively), Kansas State University (KSU) applied for an amendment to Facility Operating License No. R-88 for the KSU Training, Research, Isotopes, General Atomics (TRIGA) Mark-II Nuclear Reactor Facility. The U.S. Nuclear Regulatory Commission's (NRC's) approval of the license amendment request (LAR) would allow KSU to add up to four fuel elements that are 12 percent by weight uranium to its reactor core.

On June 5, 2019 (ADAMS Accession No. ML19128A342), the NRC staff sent KSU a letter enclosing a request for additional information (RAI) identifying additional information needed for the NRC staff to continue its review of KSU's LAR. The NRC staff's June 5, 2019, letter requested that KSU provide responses to the RAIs by October 7, 2019. Additionally, based on this RAI response date, the NRC staff provided KSU with an estimated LAR review completion date of December 31, 2020.

By letter dated October 7, 2019 (ADAMS Accession No. ML19295D727), KSU requested an extension until January 7, 2020, to respond to the NRC staff's June 5, 2019, RAI. The NRC staff granted KSU's original October 7, 2019, extension request by letter dated October 24, 2019 (ADAMS Accession No. ML19290H593). By letter dated January 7, 2020 (ADAMS Accession No. ML20013F680), KSU requested a second extension until March 7, 2020, to respond to the June 5, 2019, RAI. The NRC staff granted KSU's January 7, 2020, extension request by letter dated January 13, 2020 (ADAMS Accession No. ML20008D352).

By letter dated March 9, 2020 (ADAMS Accession No. ML20083G194), KSU requested a further extension until June 9, 2020, to respond to the June 5, 2019, RAI. KSU stated that the additional time is necessary to troubleshoot a core modeling issue.

Additionally, in its letter dated March 9, 2020, KSU confirmed that the administrative operating restrictions (discussed in its letter dated October 7, 2019, and acknowledged in the NRC staff's October 24, 2019, letter) continue to remain in place, and KSU will provide advance notification to the NRC if KSU plans to change the restrictions prior to completion of the LAR review.

The NRC staff accepts KSU's extension request dated March 9, 2020.

During a teleconference on March 18, 2020, KSU and the NRC staff discussed KSU's progress in performing analyses supporting its LAR and its response to the June 5, 2019, RAI. As discussed during the teleconference, the NRC staff encourages KSU to contact the NRC staff to discuss any questions related to the RAI. Additionally, the NRC staff could plan to conduct a regulatory audit related to the LAR before and/or after KSU submits its RAI response, to support efficient completion of the LAR review.

Based on the new RAI response date of June 9, 2020, the NRC staff is providing a revised date of August 31, 2021, by which it expects to complete its review and make a final determination on the LAR. This date could change due to several factors including a need for further RAIs, unanticipated changes to the scope of the review, unsolicited supplements to the application for amendment, and others. If the forecasted date changes, the NRC staff will notify you in writing of the new date and an explanation of the reason for the change.

If you have any questions or need additional time to respond to the NRC staff's original June 5, 2019, request, please contact me at 301-415-4067, or by electronic mail at Edward.Helvenston@nrc.gov.

Sincerely,

/RA/
