EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

0 2 On January 26, 1982, sample results from Nos. 11 and 12 Boric Acid Storage Tanks

0 3 (BAST) indicated the boric acid concentration was below the specification limit of

0 4 20,100 PPM boron. Because the reactor cavity was filled, the Refueling Water

0 5 Storage Tank (RWST) was below the minimum specification level limit. At 0720 hours,

0 6 Nos. 11 and 12 BAST's were declared inoperable, resulting in no borated water

0 7 source operable, and Action Statement 3.1.2.7 was entered.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

1 0 All core alterations and positive reactivity changes were suspended. Boric acid was
1 1 added to the tanks, and at 2037 hours samples indicated that the boron concentrations
1 2 were within specification limits. Nos. 11 and 12 BAST's were declared operable, and
1 3 Action Statement 3.1.2.7 was terminated. The procedure was revised to ensure the
1 4 BAST is recirculated and sampled prior to being returned to service.
