Docket No. 50-267

SUBJECT: DEFUELING EMERGENCY RESPONSE PLAN

REFERENCES: (1) PSC Letter, Crawford to Weiss,
Dated June 15, 1990 (P-90169)

(2) NRC Letter, Crutchfield to Crawford,
Dated December 31, 1990 (G-90314)

Gentlemen:

Public Service Company of Colorado (PSC) submitted a proposed Defueling Emergency Response Plan (DERP) for NRC approval in Reference (1). This plan was a rewrite of the Radiological Emergency Response Plan (RERP) and deleted offsite emergency response capabilities. The NRC granted an exemption from the provisions of 10CFR50.54(q) which require offsite emergency response planning for Fort St. Vrain (FSV), and approved the DERP for implementation in Reference (2).

The requirements of the FSV DERP will be implemented on March 29, 1991. As a result of this implementation, the Forward Command Post (FCP) emergency response facility in Fort Lupton, Colorado, will no longer be maintained by PSC. Consequently, the Emergency Notification System (ENS) and Health Physics Network (HPN) telephone lines at the FCP may be removed by the NRC at your convenience.

In addition, the Shift Supervisor's Office at FSV has been permanently relocated to the Control Room. Therefore, the ENS line in the old Shift Supervisor's office is no longer necessary and may also be removed.

The ENS telephone in the ISV Control Room, the ENS and HPN telephones in the Technical Support Center (TSC), and the ENS telephone in the Senior Resident Inspector's Office are required and will be maintained.

Should you have any questions, please contact Mr. Mike Holmes at (303) 480-6960.

Sincerely,

Charles H. Fuller
