Director of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention: Mr. Domenic B. Vassallo, Chief
Operating Reactors Branch No. 2
Division of Operating Reactors

Subject: James A. FitzPatrick Nuclear Power Plant
Docket No. 50-333
Proposed Radiological Effluent
Technical Specifications

- References: 1. NRC letter, D.B. Vassallo to L.W. Sinclair,
dated August 25, 1982
2. PASNY letter, J.P. Bayne to D.B. Vassallo,
dated November 22, 1982 (JPN-82-85)

Dear Sir:

Reference 1 transmitted the NRC's evaluation of the proposed Radiological Effluent Technical Specifications (RETS) and Offsite Dose Calculation Manual (ODCM) for the FitzPatrick plant. Reference 1 requested that we revise the RETS and ODCM, in accordance with the NRC evaluation, and resubmit them by October 31, 1982.

In Reference 2, we explained that additional time would be required to complete the response due to extensive plant modifications and programmatic changes made since our original submittal. We also committed to respond to Reference 1 by February 1, 1983.

Our response was undergoing final revision at the end of this January, when we learned that the NRC's criteria for RETS (NUREG-0472) had been revised. We are now in the process of obtaining a copy of the revised NUREG. As soon as we have reevaluated our response in light of the new criteria, we will inform you of our new schedule for responding to Reference 1.

COOL

This matter has been discussed with your staff. If you have any questions, please contact Mr. J.A. Gray, Jr. of my staff.

Very truly yours,

J.P. Bayne
Executive Vice President
Nuclear Generation
