Docket No. 50-336
B10677

Mr. Darrell G. Eisenhut, Director
Division of Licensing
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

- References: (1) W. G. Counsil letter to D. G. Eisenhut, dated September 2, 1982.
- (2) E. P. Rahe letter to C. O. Thomas, dated November 12, 1982.

Gentlemen:

Millstone Nuclear Power Station, Unit No. 2
NUREG-0737, Items II.K.3.30 and II.K.3.31
Small Break Loca Analysis

In Reference (1), Northeast Nuclear Energy Company (NNECO) provided the NRC Staff with the scheduled completion date of the small break LOCA model revisions in response to Items II.K.3.30 and II.K.3.31 delineated in NUREG 0737.

The purpose of this document is to inform you that in Reference (2), our fuel vendor provided to the NRC Staff the technical report describing the revised computer code in fulfillment of Item II.K.3.30 of NUREG-0737. Reference (2) also informed the staff that the small break LOCA model applicable to Combustion Engineering nuclear steam supply systems will be submitted by May 1, 1983. This schedule supercedes that outlined in Reference (1). Plant specific small break LOCA analyses utilizing the revised models are scheduled to be complete within one year after Staff approval of the model as specified in NUREG 0737, Item II.K.3.31. NNECO will provide the results of these analyses to the Staff at that time.

A046

We trust you find this information satisfactory.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY
