Gentlemen:

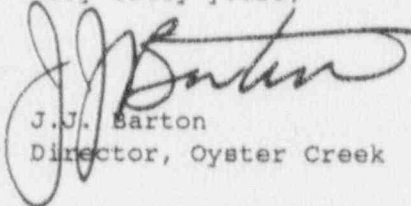

Subject: Oyster Creek Nuclear Generating Station  
Docket No. 50-219  
Change in SRO License Status

During 1988, GPUN instituted the Operations Resident Student Program to enhance Operations Department shift crews with degreed individuals. As a continuation of this program, Group Operating Supervisor (GOS) Thomas Lonsdale, NRC SRO License No. SOP-10798, Docket No. 55-7695, has been selected to participate in this program. Mr. Lonsdale commenced classes at Rutgers University on a full time basis on January 22, 1991.

Mr. Lonsdale will not actively participate in the Oyster Creek Licensed Operator Requalification program; nor will he be administered a biennial requalification exam. Mr. Lonsdale will keep current with Oyster Creek plant status by standing two instructional watches per month during this period. Upon completion of his college degree requirements in approximately 3 years, Mr. Lonsdale will be enrolled in the Accelerated Requalification Program and be required to pass a comprehensive requalification exam and detailed plant walk-through. Prior to returning to active license status, Mr. Lonsdale will meet the requirements set forth in 10 CFR 55.53(f)(1 and 2).

If there are any questions regarding this program, please contact Mr. Michael Heller, Licensing Engineer at (609) 971-4680.

Very truly yours,

J.J. Barton  
Director, Oyster Creek
