POWER AUTHORITY OF THE STATE OF NEW YORK)	Docket No. 50-333
)	
James A. FitzPatrick Nuclear Power Plant)	

APPLICATION FOR AMENDMENT
TO OPERATING LICENSE

Pursuant to Section 50.90 of the regulations of the Nuclear Regulatory Commission, the Power Authority of the State of New York, as holder of Facility Operating License No. DPR-59, hereby applies for an Amendment to the Technical Specifications contained in Appendices A and B of this license.

Three proposed changes to the James A. FitzPatrick Technical Specifications alter the management organization. The first realigns the Procedures and Performance Department of Appendix A, Figure 6.1-1, and changes its name to "Quality Assurance and Reliability Department." The new department assumes the prior duties of the Procedures and Performance Department and, in addition, now performs audits and appraisals of the security program.

The second change revises the title of the Senior Vice President - Nuclear Generation to that of Executive Vice President - Nuclear Generation throughout Appendices A and B. The third corrects a management title which was inadvertently not changed during a prior technical specification change approved by the Commission.

The proposed changes to the Technical Specifications are
Attachment I to this application. The Safety Evaluation for this
change is included as Attachment II.
