Docket No. 50-344, License No. DPR-66  
Beaver Valley Power Station Emergency Preparedness Plan

Gentlemen:

In keeping with the established submission schedule for review of the stations annual Emergency Preparedness Exercise, Duquesne Light Company is providing the attached exercise controller/prompter package for the scheduled February 16, 1983 full scale exercise. This submission follows the December 27, 1982 submission of the exercise sequence of events, and the November 23, 1982 submission of the exercise scope and objectives.

Please note that this final package submittal includes a revised onsite scenario/sequence of events section which addresses the comments received to date from those NRC individuals involved in review of our earlier submissions.

To keep the exercise efforts progressing in an orderly manner, Duquesne Light Company requests that any final comments or requests for modification to the submitted material be provided to Duquesne Light Company no later than February 10, 1983. Your cooperation on this matter is greatly appreciated and will help ensure that the completed exercise package will be one that results in the successful conduct of this exercise.
