WILLIAM D. HARRINGTON  
SENIOR VICE PRESIDENT  
NUCLEAR

February 15, 1983

BECO Ltr. #83-52

Mr. Domenic B. Vassallo, Chief  
Operating Reactors Branch #2  
Division of Licensing  
Office of Nuclear Reactor Regulation  
U.S. Nuclear Regulatory Commission  
Washington, D. C. 20555

License No. DPR-35  
Docket No. 50-293

Response to NRC Letter Dated Dec. 20, 1982  
Titled NUREG 0737 Item I.C.6

Dear Sir:

Boston Edison has reviewed the subject letter and has developed a plan which will modify our station policy regarding Item I.C.6. Our re-evaluation includes a review of NUREG 0737 I.C.6 guidance and ANSI/ANS 3.2 - 1982. Sec. 5.2.6.

Accordingly, the policy should conform to the guidelines of I.C.6 considering ALARA and personnel resource requirements. In cases where the guidelines of I.C.6 are not adopted by station policy, justification will be provided. Based on this plan, our scheduled date for a Station Policy is March 21, 1983. Our plan for corrective action to the station procedures will be submitted by May 13, 1983. This delay is based on our inability to determine the impact of changes to the procedures at this time.

If you have any questions, please contact us.

Very truly yours,

*WD Harrington*
