## EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

02 During A/E review of the SIRWT support structure, discrepancies between the  
03 support structure and as built documents were noted. Specifically, 14 3 ft.  
04 square openings are present in the concrete beams vs 9 openings identified  
05 on as built documentation. Evaluation has concluded that although the exist-  
06 ing condition is not in accordance with the FSAR and ACI Code, sufficient  
07 capacity to resist specified loading is maintained. Event reportable per  
08 TS 6.9.2.a(9). No threat to public health/safety results.

## CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

10 Cause attributed to failure to document construction changes in as built  
11 documentation. Modification proposals are currently under evaluation which  
12 will bring the SIRWT support structure into compliance with the Palisades  
13 FSAR and ACI Code. Specific information relative to modification design/  
14 schedule will be provided when available.
