Atlanta, Georgia 30303

Dear Mr. O'Reilly:

BELLEFONTE NUCLEAR PLANT UNITS 1 AND 2 - SECOND SUPPLEMENTAL RESPONSE TO  
VIOLATION 50-438, 50-439/82-23-04 - INADEQUATE INVESTIGATION OF GENERIC  
ASPECTS AND FAILURE TO IDENTIFY CAUSE FOR SIGNIFICANT DEFICIENCIES

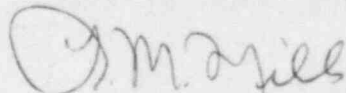

This is in response to R. C. Lewis' letter dated August 26, 1982, report numbers 50-438/82-23, 50-439/82-23, concerning activities at the Bellefonte Nuclear Plant which appeared to have been in violation of NRC regulations. The previous response to this violation was submitted on October 7, 1982. A supplemental response was submitted on November 30, 1982. As discussed with NRC-OIE Inspector Paul Fredrickson by telephone on December 6, 1982, the date of December 10, 1982 for completion of corrective actions indicated in our last supplemental response on this matter was not met. TVA is making an effort to identify cause and actions to prevent recurrence for the last of the affected nonconformance reports (NCR 1315). TVA is attempting to accomplish this by contacting the subvendor through B&W. TVA anticipates an extended delay in the receipt of information even though TVA is requesting input as soon as possible in order to resolve NRC concerns. The corrective action on this matter will be completed by June 22, 1983.

If you have any questions concerning this matter, please get in touch with R. H. Shell at FTS 858-2688.

To the best of my knowledge, I declare the statements contained herein are complete and true.

Very truly yours,

TENNESSEE VALLEY AUTHORITY
