Dear Mr. O'Reilly:

BELLEFONTE NUCLEAR PLANT UNITS 1 AND 2 - SUPPLEMENTAL RESPONSE TO VIOLATION
50-438,50-439/82-22-01 - VIOLATION OF CABLE MINIMUM BEND RADIUS

This is in response to R. C. Lewis' letter dated August 12, 1982, report numbers 50-438/82-22, 50-439/82-22, concerning activities at the Bellefonte Nuclear Plant which appeared to have been in violation of NRC regulations. The original response to this violation was submitted September 9, 1982, and a revised response was submitted September 24, 1982. As discussed with NRC-OIE Inspector R. V. Crlenjak by telephone on December 3, 1982, the date of December 20, 1982 for completion of corrective actions indicated in our revised response on this matter will not be met. Although TVA has contacted the vendors of the cables, they require more time to evaluate this condition. The corrective action on this matter will be completed by July 1, 1983.

If you have any questions concerning this matter, please get in touch with R. H. Shell at FTS 858-2688.

To the best of my knowledge, I declare the statements contained herein are complete and true.

Very truly yours,

TENNESSEE VALLEY AUTHORITY

L. M. Mills, Manager
Nuclear Licensing
