W. L. STEWART  
VICE PRESIDENT  
NUCLEAR OPERATIONS

March 3, 1983

Mr. Harold R. Denton, Director  
Office of Nuclear Reactor Regulation  
Attn: Mr. Darrell G. Eisenhut, Director  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Serial No. 100  
NO/JHL:acm  
Docket No. 50-338  
License No. NPF-4

Gentlemen:

VIRGINIA ELECTRIC AND POWER COMPANY  
NORTH ANNA POWER STATION UNIT NO. 1  
NUREG-0737 ITEM II.F.1.3

In our revision 3 response to NUREG-0737, dated June 28, 1982, Vepco stated that the final in-situ calibration of the Containment High Range Radiation Monitors will be performed during the first scheduled outage after availability of a calibration system to Vepco.

The vendor of the Containment High Range Radiation Monitors (Victoreen) does not have a source available to perform the final in-situ calibration. Victoreen has expedited the development of a prototype calibration source to calibrate this system but it is not available to Vepco. It is Vepco's understanding that Victoreen will have a source available to perform the final in-situ calibration of the system in order to comply with a September 30, 1984 completion date.

The status of NUREG-0737, Item II.F.1.3 will be updated in revision 4 of NUREG-0737 which is scheduled for completion by March 31, 1983.

Very truly yours,

*W. L. Stewart*  
W. L. Stewart

cc: Mr. Robert A. Clark, Chief  
Operating Reactors Branch No. 3
