Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
Attn: Mr. Robert A. Clark, Chief
Operating Reactors Branch No. 3
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Serial No. 679A
NO/JHL/jmj/ILM043
Docket Nos. 50-338
50-339
License Nos. NPF-4
NPF-7

Gentlemen:

AMENDMENT TO OPERATING LICENSES NPF-4 AND NPF-7
NORTH ANNA POWER STATION UNIT NOS. 1 AND 2
SUPPLEMENT TO PROPOSED TECHNICAL SPECIFICATION CHANGES

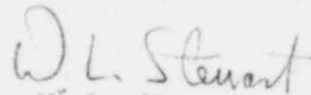

In our letter dated December 17, 1982, Serial No. 679, Vepco submitted proposed Technical Specification changes for North Anna Unit Nos. 1 and 2. These proposed Technical Specification changes were related to the Radiological Effluent Technical Specifications. This proposed change supplements our above referenced license amendment application.

This proposed change, as discussed with Mr. W. W. Meinke of your staff, is to delete the remaining portions of the Environmental Technical Specifications that were not deleted in the December 17, 1982, Radiological Effluent Technical Specification submittal. Attachment 1 provides the proposed Technical Specification changes. A discussion of the proposed Technical Specification change is provided in Attachment 2.

This request has been reviewed and approved by the Station Nuclear Safety and Operating Committee and the Safety Evaluation and Control Staff. It has been determined that this request does not involve an unreviewed safety question.

We have reviewed this request in accordance with the criteria in 10CFR170.22. Since this request supplements our previous license amendment application referenced above, no additional license amendment fee is required.

Very truly yours,

W. L. Stewart

Attachment:

1. Proposed Technical Specification Changes
2. Discussion of Proposed Technical Specification Change
