Licensee Event Report
50-321/78-30
May 30, 1978

ATTENTION: Mr. James P. O'Reilly

Gentlemen:

Licensee Event Report (LER) 50-321/78-30 dated May 30, 1978, was issued in response to the failure to adequately control the issuance of LERs as determined by a management audit. As part of the corrective action noted in LER 78-30, the Plant Hatch Quality Assurance (QA) department has manually tracked LERs to assist the plant management in preventing an LER from being missed or late.

Since that corrective action was proposed and implemented, a Plant Regulatory Compliance Group has been established at Plant Hatch. As part of its function, this group tracks LERs with a computer system. With this new approach to LER management, the manual tracking by QA has become duplicatory and inefficient.

We have, therefore, ceased the manual tracking by the QA department of LERs and hereby notify you of this action.

If you have questions or comments in this regard, please contact this office.

Very truly yours,

L. T. Gucwa

L. T. Gucwa
Chief Nuclear Engineer
