Perry Nuclear Power Plant
Docket No. 50-440
Corrective Action Schedule Change: Reply
to Inspection Report 930023

Gentlemen:

This letter is submitted to confirm the previous notification of a schedule change for a corrective action documented in response to Notice of Violation (NOV) 93023-02. Full compliance with the requirements cited in NOV 93023-02 was achieved on January 24, 1994; however, an additional enhancement to the remedial corrective actions remains open.

The corrective action involves the implementation of a Maintenance Monitoring Program which is designed to use performance monitoring and peer evaluation teams to periodically observe and evaluate work order processing and field execution. At the time this corrective action was submitted, it was stated that the program would be in place by July 1, 1994, which was anticipated to be after the end of the current refueling outage (RFO 4). This action was also previously addressed under Perry Course of Action (PCA), Section 3.2.2.6.

Due to changes in the schedule for completion of refueling outage activities, implementation of the Performance Monitoring Program has been deferred to coincide with the schedule for the associated PCA action. As currently scheduled, this action is expected to be completed in August 1994.

If you have questions or require additional information, please contact Mr. James D. Kloosterman, Manager - Regulatory Affairs, at (216) 280-5833.

Very truly yours,
