12\*32

This letter documents verbal discussion between R. Wieland, CPCo and Dr. R. Landsman, NRC Region III, 5/12/83, 1:15 PM.

CPCo asked to excavate three additional shallow holes on the south side of the diesel generator building to facilitate disposition of outstanding NRC's on the diesel fuel lines (Activity #802450005). Dr. Landsman concurred that these excavations constituted only a minor change to the previously approved activity.
