Dear John Ahearne -

The recent problems at Vermont Yankee have confirmed my strong feeling for the need of a thorough and public investigation into all aspects of the plant. Such an investigation should be followed by a public hearing to present the findings. The haphazard repairs, repeated discoveries of further damage and weakness, and the incomplete blurbs fed the public on the radio are unsatisfactory concerning such a serious and universal issue.

I hope you will do what you can to initiate and support a public investigation and hearing.

Thank you,

Jill Kienholz
