The Village of Buchanan has been proud to be a part of the development of our energy needs in this country by housing one of the first commercial nuclear plants in the United States.

For 20 years Con Edison and for 8 years the Power Authority of the State of New York have been an active and cooperative part of our community. We will not deny that they have been an intricate part in the development of our Village and its services; but beyond that, they have also been a part of the development of our County and State.

To say that this is a local issue would be a miss statement. This is a National issue, and we the governing body of the Village of Buchanan, are secure in the fact that the plants are safe, clean energy and a vital part of our future.

Thank you.
