Subject: Seabrook Station FSAR RAIs 230.7 and 230.8, Request for NRC
Assistance

Dear Sir:

The subject FSAR RAIs requested information on the January 9, 1982 New Brunswick earthquake sequence and the January 18, 1982 Franklin, New Hampshire earthquake. It is our understanding that the U. S. Geological Survey (Menlo Park, California) has possession of the strong motion recordings from the New Brunswick events. It is our further understanding that the U. S. Army Engineer's Waterways Experiment Station, Vicksburg, Mississippi, has possession of the records from the Franklin, New Hampshire event.

To facilitate our response to your FSAR RAIs (230.7 and 230.8), it is necessary that we obtain the appropriate earthquake records from the U. S. Geological Survey and the U. S. Army Engineers. Accordingly, we request your assistance in obtaining these recordings by contacting the above agencies. Upon receipt of this information, we will proceed with preparation of our responses to the subject RAIs.

Very truly yours,

YANKEE ATOMIC ELECTRIC COMPANY
