Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
Monthly Operating Reports for June 1994
San Onofre Nuclear Generating Station, Units 2 and 3

Technical Specification 6.9.1.10 of Facility Operating Licenses NPF-10 and NPF-15 for the San Onofre Nuclear Generating Station, Units 2 and 3, respectively, requires SCE to provide a Monthly Operating Report for each Unit, which includes: routine operating statistics and shutdown experience; all challenges to safety valves; any changes to the Offsite Dose Calculation Manual (ODCM); and any major changes to the radioactive waste treatment system. All covered activities are reported monthly, except for ODCM changes, which are reported within 90 days from the time the changes were made effective.

This letter transmits the June 1994 Monthly Operating Reports for Units 2 and 3, respectively. There were no challenges to safety valves, and no major changes to the Units 2 and 3 radioactive waste treatment systems during the reporting period. Additionally this report includes a revision to the Unit 3 generator on-line hours for the months of April and May. This change is also reflected in the shutdown duration for the shutdown reported in April.

If you require any additional information, please let me know.

Sincerely,

Walter C. Marsh
