Docket No. 50-348

Director, Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Attention: Mr. S. A. Varga

Joseph M. Farley Nuclear Plant - Unit 1  
Environmental Qualification

Gentlemen:

Alabama Power Company has carefully reviewed your letter dated January 19, 1982 requesting additional qualification information and has contacted the vendors that have provided the information identified in your Item 1. Certain vendors have stated that their qualification information is proprietary and expressed concern as to possible unfair trade advantage and conflict of interest regarding the review by Franklin Research Center. Specifically, Westinghouse has requested (Attachment) that Alabama Power Company not submit their proprietary information to Franklin Research Center. Pursuant to an agreement reached between Westinghouse and Mr. E. C. Shomaker of the NRC Office of the Executive Legal Director, who has discussed this matter with Mr. Z. Roztoczy of the Equipment Qualification Branch, Westinghouse will ensure that the requested information is, or has been, submitted to the NRC on a timely basis. Therefore, the information other than proprietary Westinghouse qualification documents has been retrieved from our auditable central file and is forwarded directly to your office to ensure the proprietary understandings between Alabama Power Company and the vendors have not been disregarded or neglected.

Alabama Power Company requests that the entire submittal be reviewed by your office and only information which is not proprietary, as designated below, be submitted to Franklin Research Center. Additionally, no part of this submittal should be released for public disclosure or reproduced, and the entire submittal must be returned to Alabama Power Company upon the completion of the review. Alabama Power Company has reconciled this matter with Mr. E. C. Shomaker of the NRC Office of the Executive Legal Director. If affidavits are required for withholding the proprietary information from public disclosure in accordance with 10 CFR Section 2.790 of the Commission's rulemaking, Alabama Power Company is requested to be notified before such disclosure.

The following is a listing of the enclosed qualification information designated as proprietary (P) or non-proprietary (N):

1. Qualification Documents

- a) Westinghouse letter APW-A-5141, (N)  
February 14, 1980
  - b) Wyle Laboratories NEQ, (N)  
Test Report 44354-1, March 8,  
1979 (Identified as Report 44353-1  
in NRC letter)
  - c) Boston Insulated Wire and Cable (P)  
Company, Test Report 73E062,  
September 7, 1973
  - d) Westinghouse letter NS-TMA-1950; (To be provided  
Westinghouse letter NS-TMA-2120, by Westinghouse)
  - e) ACME-Cleveland Development Company (N)  
Qualification Report, September 5, 1978;  
NAMCO letter dated February 2, 1981;  
NAMCO Report No. QTR/105, August 28, 1980;  
NAMCO letter dated December 16, 1981
  - f) WCAP-7820, Supplements 1 through 7; (To be provided  
Westinghouse letter (O. Batum) dated by Westinghouse)  
February 14, 1980
  - g) Westinghouse letter, APW-A-5141, (N)  
February 14, 1980,
  - h) Boston Insulated Wire and Cable Company, (P)  
Test Report 74A023, January 24, 1974
  - i) Okonite Engineering Report No. 143, (P)  
March 20, 1972
2. Further identification of installed cable (N)  
described in Alabama Power Company letter  
dated August 25, 1981

In order to provide for a proper review, Alabama Power Company has enclosed the most complete and latest qualification information which, for certain items, amends or enhances your request. For Item 1.e, ACME - Cleveland Development Company

Director, Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Attention: Mr. S. A. Varga

February 19, 1982  
Page 3

Qualification Report dated November 21, 1977 has been superceded by a revision dated September 5, 1978. The 1978 revision is enclosed in lieu of the 1977 report. NAMCO letter dated December 16, 1981 is enclosed with Item 1.e to provide the revised pages to NAMCO Report No. QTR/105.

As a note of clarification, Items 1.a, f, and g of your letter each requested the identical Westinghouse letter, APW-A-5141, (O. Batum) dated February 14, 1980. This letter was referenced in our responses to I.E. Bulletin 79-010 to provide administrative traceability to the supplier of certain qualification information and to establish their proprietary nature. Although this non-proprietary letter is enclosed, it is a Westinghouse transmittal letter which provided the Westinghouse qualification documents (Items 1.d and f) and, of itself, does not include any useful qualification information.

The letter provides the complete response to your request. If you have any questions, please advise.

Yours very truly,

  
F. L. Clayton, Jr.

Mr. O. D. Kingsley  
Manager of Nuclear Engineering  
and Technical Support  
Alabama Power Company  
600 North Eighteenth Street  
Birmingham, AL 35202

Dear Mr. Kingsley:

JOSEPH M. FARLEY NUCLEAR PLANT  
UNITS 1 AND 2  
Equipment Environmental Qualification

Recently the NRC has issued letters to some utilities regarding the results of the staff review of the utility response to the Safety Evaluation on Equipment Qualification. The letters (samples attached) request certain EQ information from the utility central file be forwarded to Franklin Research Center to facilitate the NRC contractor review.

Where the requested information is not proprietary to Westinghouse, it is appropriate for utilities to submit such information directly to Franklin. Pursuant to an agreement reached between Westinghouse and Mr. E. Shomaker of the NRC Office of the Executive Legal Director, who has discussed this matter with Mr. Z. Rosztoczy of the Equipment Qualification Branch, we ask that you not submit Westinghouse proprietary information to Franklin. Westinghouse will ensure that any such requested material is, or has been, submitted directly to the NRC on a timely basis. (Westinghouse has verified that this is acceptable with Mr. Rosztoczy via telecon between him and Mr. G. Butterworth, 2/19/82.)

Should you have any questions concerning the above information, please contact myself or Mr. George Butterworth of our Nuclear Safety Department (412) 373-5761.

L.E. Conway/je
