

APPLICATION FOR AMENDMENT  
TO  
FACILITY OPERATING LICENSE NO. NPF-3  
FOR  
DAVIS-BESSE NUCLEAR POWER STATION  
UNIT NO. 1.

Enclosed are forty-three (43) copies of the requested changes to the Davis-Besse Nuclear Power Station Unit No. 1 Facility Operating License No. NPF-3, together with the Safety Evaluation for the requested change.

The proposed changes include:

1. Sections 6.5.2.8.e, 6.5.2.8.f

By /s/ R. P. Crouse  
Vice President, Nuclear

Sworn and subscribed before me this                      day of May, 1983.

/s/ Nora Lynn Flood  
Notary Public  
My commission expires September 1, 1987.

S E A L

Docket No. 50-346  
License No. NPF-3  
Serial No. 947  
May 19, 1983

Attachment I

I. Changes to Davis-Besse Nuclear Power Station Unit 1, Appendix A  
Technical Specification Sections 6.5.2.8.e, 6.5.2.8.f.

A. Time required to Implement. This change is to be effective upon  
NRC approval.

B. Reason for Change (Facility Change Request 82-162).

This is to comply with Mr. D. G. Eisenhower's letters of October  
1, 1982 and October 30, 1982 (Generic Letters 82-17 and 82-23,  
Log Nos. 1103 and 1125).

C. Safety Evaluation

(See attached)

D. Significant Hazards Considerations

Toledo Edison has reviewed the above Amendment Request in  
accordance with 10 CFR 50.92(c) and has determined the proposed  
amendment would not:

- (1) involve a significant increase in the probability or  
consequences of an accident previously evaluated; or
- (2) create the possibility of a new or different kind of  
accident from any accident previously evaluated; or
- (3) involve a significant reduction in a margin of safety.

The above determination is based on the attached Safety  
Evaluation.

### SAFETY EVALUATION

This amendment requests a change to the Davis-Besse Nuclear Power Station Unit No. 1 Technical Specifications as requested in two letters from Mr. D. G. Eisenhut (Generic Letter Nos. 82-17 and 82-23, Log Nos. 1103 and 1125) to comply with the requirements of 10CFR50.54(t) and 10CFR73.40(d) respectively.

The safety function of the Emergency Plan audit is to ensure that the Emergency Plan and Implementing Procedures are evaluated for adequacy of interfaces with State and Local governments and of licensee drills, exercises, capabilities, and procedures.

The safety function of the Security Plan audit is to ensure that the Security Plan and Implementing Procedures perform its design function and that it comply with regulations.

T.S. 6.5.2.8.e provides for an audit of the Davis-Besse Nuclear Power Station Emergency Plan and Implementing Procedures to be performed under the cognizance of the Company Nuclear Review Board (CNRB) at least every 24 months. This request will change that period to at least every 12 months.

T.S. 6.5.2.8.f provides for an audit of the Davis-Besse Nuclear Power Station Security Plan and Implementing Procedures to be performed under the cognizance of the Company Nuclear Review Board (CNRB) at least every 24 months. This request will change that period to at least every 12 months.

By decreasing the audit frequency period to an annual requirement for the above requested change, the safety function of the audit will not be affected.

Therefore, it is concluded that the proposed changes are not an unreviewed safety question.
