Mr. William Russell, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington D.C. 20555

Attention: Document Control Desk

Subject: GL 92-01, "Reactor Vessel Structural Integrity" Data Update

Byron Station Units 1 and 2
(NPF-37/66; NRC Docket Nos. 50-454/455)

Braidwood Station Units 1 and 2
(NPF-72/77; NRC Docket Nos. 50-456/457)

Reference: R. R. Assa letter to D. L. Farrar dated June 24, 1994, requesting verification of data pertaining to GL 92-01, "Reactor Vessel Structural Integrity"

Dear Mr. Russell:

By letters dated July 2, 1992, and November 19, 1993, Commonwealth Edison Company (ComEd) provided a response to GL 92-01, Revision 1. In the above referenced letter, the Staff requested the ComEd verify the previously supplied information by July 24, 1994, as this data will be entered into a Reactor Vessel Integrity Database.

ComEd respectfully requests that the Byron data verification/update be delayed until early September, 1994 as the analysis of the Unit 2 Reactor Vessel Radiation Surveillance Program Capsule W will be completed in August, 1994. It is anticipated that some of the previously provided data will be updated.

ComEd also respectfully requests that the Braidwood data verification/update be delayed until August 8, 1994 to allow for a complete and accurate verification of the subject data.
