7 8 REPORT SOURCE 60 61 DOCKET NUMBER 68 69 EVENT DATE 74 75 REPORT DATE 80

0 2 A Nonconformance Report (NCR) resulting from a SCE Quality Assurance audit of
0 3 procurement and configuration records of the reactor Trip Circuit Breaker (TCB)
0 4 supplier, identified possible problems related to source inspection, manufacturing
0 5 and configuration control of TCB-5, -6, -7, and -8. There was no impact on public
0 6 health and safety since the unit has not achieved initial criticality and all rods
0 7 remained in the core.

1 1 The cause of this event was failure of the supplier's QA program to adequately
1 1 monitor the work and certification of its subcontractors. TCB-5, -6, -7, and -8 were
1 2 removed on May 9, 1983 and are pending return to the supplier. They will be replaced
1 3 by certified breakers by June 1, 1983.

Attention: Mr. J. B. Martin, Regional Administrator

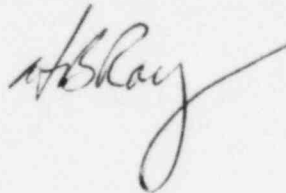

Dear Sir:

Subject: Docket No. 50-362
30-Day Report
Licensee Event Report No. 83-025
San Onofre Nuclear Generating Station, Unit 3

Pursuant to Section 6.9.1.13.C of Appendix A, Technical Specifications to Facility Operating License NPF-15 for San Onofre, Unit 3, this submittal provides the required 30-day written report and a copy of Licensee Event Report (LER) for an occurrence involving the Reactor Protection System (RPS). Enclosed LER 83-025 addresses this event, including corrective actions and measures to prevent recurrence.

If there are any questions regarding this event, please contact me.

Sincerely,

Enclosure LER 83-025, Unit 3
