500 SOUTH 27TH STREET, DECATUR, ILLINOIS 62525

April 13, 1982

Mr. James G. Keppler  
Director, Region III  
Office of Inspection and Enforcement  
U.S. Nuclear Regulatory Commission  
199 Roosevelt Road  
Glen Ellyn, Illinois 60137

Dear Mr. Keppler:

Deficiency 80-02

10 CFR 50.55(e)

S&L Soil Characteristics error in the  
Clinton Power Station design

The purpose of this letter is to update you on the status of the potential reportable deficiency concerning the S&L soil characteristics error in the Clinton Power Station design. The analytical work by the architect engineer and the NSSS supplier has been completed. The final determination of reportability will be determined after receipt of the report and a complete review has been completed. We anticipate that an additional 90 days will be required to perform the review and make final determination of reportability.

If you have any further questions concerning this matter, please do not hesitate to bring them to my attention.

Sincerely,

W.C. Gerstner  
Executive Vice President
