Mr. George Kuzmycz
U. S. Nuclear Regulatory Commission
7920 Norfolk Ave.
Bethesda, MD 20034

SUBJECT: Update of "P" and "G" Letter Logs

Dear Mr. Kuzmycz:

Attached per our telephone conversation are the updates to the "P" and "G" Letter Logs through pages 95 and 140 respectively. You will note some extra pages for each log that do not follow the normal page sequence numbering system. PSC has unfortunately discovered a problem with the new word processing system, which has caused the computer base to be dumped to file, rendering log index reporting functions inoperable.

We are in the process of correcting the problem and will transmit new indices when they become available.

Very truly yours,

L. Milton McBride

L. Milton McBride
Tech./Adm. Services Manager
Fort St. Vrain Nuclear
Generating Station
