Perry Nuclear Power Plant  
Docket No. 50-440  
Response to Notice of  
Violation

Gentlemen:

By correspondence dated April 25, 1994 the Nuclear Regulatory Commission (NRC) transmitted Inspection Report 50-440/94004 and an associated Notice of Violation (NOV). The response to this NOV was transmitted by correspondence dated June 3, 1994 (letter PY-CEI/NRR-1804L). The response to violation 94004-01 included a commitment to form by August 1, 1994 a task force to assess and develop an implementation strategy based on recommendations from a completed study of the process which governs procedure development, review approval and revision. This activity is part of an overall plan to improve performance in the areas of procedural compliance and procedural deficiencies.

As a result of the extension of the fourth refueling outage this task force will not be formed until September 15, 1994. The delay in forming the task force recognizes that this important effort demands the full attention of the task force members which would not be possible during the current outage.

If you have questions or require additional information, please contact Mr. James Kloosterman, Manager - Regulatory Affairs at (216) 280-5833.

Very truly yours,

040021
