Docket No. 50-352
License No. NPF-39

U. S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555

Subject: Limerick Generating Station, Unit 1
Generic Letter 89-10, "Safety Related Motor-Operated
Valve Testing and Surveillance - 10 CFR 50.54 (f)"
NRC Notification of Completion of Items Contained in First
Paragraph of Item i.

References: 1) Letter from D. R. Helwig (PECO Energy) to NRC dated
December 28, 1989
2) Letter from D. R. Helwig to NRC dated March 16, 1992
3) Letter from G. A. Hunger, Jr. (PECO Energy) to NRC dated
April 14, 1994

Dear Sir:

NRC Generic Letter (GL) 89-10, "Safety Related Motor-Operated Valve Testing and Surveillance - 10 CFR 50.54 (f)," item m, requires licensees to notify the NRC in writing within 30 days after the actions described in the first paragraph of item i of the GL have been completed. The purpose of this letter is to provide the NRC with notification that these actions have been completed on June 28, 1994, for Limerick Generating Station (LGS) Unit 1 valves, and those valves common to Units 1 and 2, in accordance with PECO Energy Company's commitments as documented in the referenced letters. A GL 89-10 closure report as well as supporting technical information is being prepared and will be available for review.

In response to GL 89-10, PECO Energy developed and implemented a program to verify the design basis capability of motor operated valves (MOVs) within the scope of the program. The GL 89-10 program MOVs at LGS Unit 1 have been tested, and with the exception of six MOVs, have been set-up with the best available data in accordance with the program. The six MOVs not set-up in accordance with the conservative program methodology have been determined to be operable and non-conformance reports have been written specifying actions required to bring them into conformance with the program.

PECO Energy has made a significant commitment of resources toward implementing the GL 89-10 program at LGS. Completion of the program involved more than a five-year effort including maintenance and testing of over 200 MOVs. Program changes deemed necessary in response to emerging issues and newly available data beyond closure will be handled under the provisions of 10 CFR 50.59.

If you have any questions or require additional information, please do not hesitate to contact us.

Sincerely,

G. A. Hunger, Jr.
Director - Licensing
