We have completed a review and update of the Security Plan for the AGN-201M reactor located at the University of New Mexico, Docket 50-252. Changes have been made in the University structure and are reflected in this new document. There has been an upgrade to the electronic surveillance system and placement of a separate system in the reactor room. These changes and changes in police procedures resulting from the implementation of the new alarm system are noted in the revised document. Note that this document contains **proprietary information**. An original and three copies of the revised document are hereby submitted for approval pursuant to 10CFR50.34.

If you have questions or comments, please let us know.

Sincerely,

Robert D. Busch, Ph.D., P.E.  
Chief Reactor Supervisor

Norman Roderick, Ph.D.  
Reactor Administrator
