In the Matter of  
THE REGENTS OF THE UNIVERSITY OF CALIFORNIA  
(UCLA Research Reactor)  
Docket No. 50-142  
(Proposed Renewal of Facility License)

Dear Administrative Judges:

Enclosed are the professional qualifications statements for the University's witnesses for the upcoming safety hearing. We have not yet received statements for several of our witnesses; these statements will be forwarded as soon as they are received. Also enclosed in response to the Board Chairman's April 25, 1983 request are several drawings of the Argonaut reactor which do not appear in the materials in Appendix III of University's application which the Board has nor in the materials recently sent by the Staff.

Please note that we have included a statement of professional qualifications for Dr. Harry A. Morewitz who was not previously noticed as one of University's proposed witnesses but who we have asked to provide testimony on the fission products dispersion questions which the Board recently added to the list of topics for the hearing beginning in July.

As we indicated at the time our witness list was submitted, there is overlap in the topics which were identified with our witnesses. We expect to submit written testimony from no more than ten of the witnesses with whom we have consulted.

Respectfully submitted

Representing UCLA
