Docket No. 50-461

Mr. A. Schwencer, Chief  
Licensing Branch No. 2  
Director of Nuclear Reactor Regulation  
Division of Licensing  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Schwencer:

Reference: IP Letter 0970-L, from D. P. Hall to A. Schwencer,  
"Requirements for Emergency Response Capability";  
dated April 13, 1983

Clinton Power Station, Unit #1  
Supplement 1 to NUREG-0737:  
Requirements for Emergency Response Capability

NRC Generic Letter 82-33, Supplement 1 to NUREG-0737, provided clarification and guidance regarding emergency response initiatives at commercial nuclear power facilities. The referenced letter provided your staff with a description of Illinois Power Company's (IP) Emergency Response Capability Implementation Plan (ERCIP) for phased implementation and integration of these emergency response initiatives at the Clinton Power Station (CPS).

In addition to a description of the ERCIP program, Generic Letter 82-33 requested that a proposed schedule for implementing each of the basic requirements identified in NUREG-0737 Supplement 1 be provided. This letter provides, as Attachment #1, the ERCIP implementation schedule. Attachment #2 is a listing of submittals required by NUREG-0737 Supplement 1 and provides corresponding schedule dates for your convenience.

We will be happy to meet with your staff to explain our integrated ERCIP plan and schedule in more detail, if you so desire.

Sincerely,

*G. E. Wuller*
