Mr. John F. Stolz, Chief
Operating Reactors Branch #4
Division of Licensing
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Stolz:

Your letter of December 20, 1982 forwarded the Safety Evaluation for the Environmental Qualification of Safety Related Electrical Equipment.

In the safety evaluation you requested that we inform you regarding the status of certain items which have been classified as proprietary.

We request the following disposition for the items currently listed as Proprietary in the Reference Index of Technical Evaluation Report (TER-C5257-493).

1. The following items no longer require proprietary treatment:

18, 32, 42, 43, 44

2. The following generic items were not submitted by Philadelphia Electric for Peach Bottom although they are referenced, therefore, it is inappropriate to comment on their proprietary status.

649, 806, 2844

A048

3. The following items are listed as proprietary on behalf of equipment suppliers. We have requested that they review these documents and, if they find that the proprietary status is to be maintained, provide us with supportive declarations and the appropriate affidavit so that we may formally request withholding. We will advise you further promptly upon receipt of this information from the suppliers.
