U. S. Nuclear Regulatory Commission
Washington, DC 20555

SUBJECT: Arkansas Nuclear One - Units 1 & 2
Docket Nos. 50-313 and 50-368
License Nos. DPR-51 and NPF-6
Proposed Technical Specification
Change-Surveillance Requirement
For Operable Status

Gentlemen:

Arkansas Power and Light was requested to submit a request for a Technical Specification change that would reflect the wording of NUREG-0212, Revision 2, paragraph 4.0.3. This request was contained in the letter from Messrs. Clark and Stolz dated January 25, 1982, (ØCNAØ18211). We submitted a change request dated May 28, 1982, (ØCANØ5821Ø) which was judged to be unacceptable since it "reflected neither the wording nor the intent of NUREG-0212 (Revision 2)." This topic was further discussed at a meeting at ANO on September 28, 1982, and summarized in a letter from W. C. Seidle dated October 13, 1982, (ØCNA1Ø821Ø) in which he requested that AP&L provide a revised submittal. Accordingly, the enclosed Technical Specification change is submitted in place of our May 28, 1982, request.

January 14, 1983

This change reflects exactly the intent of the wording of NUREG-0212, Revision 2. In the interim (while we are awaiting your approval) we will continue to use the NUREG-0212 definition of operable for operability determinations.

Very truly yours,

William Cavanaugh III
