ALVIN W. VOGTLE NUCLEAR PLANT - UNITS 1 AND 2  
PSAR CHAPTER 17 UPDATE

Dear Mr. O'Reilly:

In accordance with 10 CFR Part 50.30 and Part 50.54, we are submitting 3 signed originals of Supplement 9 to the Alvin W. Vogtle Nuclear Plant PSAR Chapter 17. In addition, we are submitting 60 copies to the Document Control Desk in Washington, D.C.

As can be seen from the Supplement, the basic Quality Assurance program has not been changed significantly. There have been a number of organizational changes which we think enhances the overall program to give a quality product during the construction of the Vogtle units. An example of these changes was the creation of the position of General Manager, Quality Assurance and Radiological Health and Safety. This organizational change was described in a letter to Mr. Eisenhower on October 25, 1982.

Other type changes relate to modifications such as our proposal modifying the Field Change Request program to allow work to continue on minor problems prior to full engineering approval by the utilization of an additional system - the "Authorization to Continue Work" (ATCW). Georgia Power Company believes that this proposed modification to the Field Change Control program is an improvement to the present system for handling minor changes. This proposed change was transmitted to you on May 4, 1983.

The above and other similar changes to the description of the Quality Assurance program since the issuance of Supplement 2 on March 2, 1977 are identified as S9 in the text. To avoid confusion, this updated information should be inserted in totality in the PSAR Chapter 17 in the place of the Supplement 2 information previously submitted.

Should you need additional information or clarification, we will be available to discuss this with you at your convenience.

Sincerely,

D. O. Foster  
Vice President and General Manager  
Vogtle Project
