Subject: Limerick Generating Station, Units 1 and 2  
Technical Specifications Change No. 93-11-0  
Revised Technical Specifications Pages

Gentlemen:

By letter dated August 25, 1993, PECO Energy Company submitted Technical Specifications (TS) Change Request No. 93-11-0 for Limerick Generating Station (LGS), Units 1 and 2, for NRC review and approval. This proposed TS change requested that TS Section 3.3.7.8.2, and associated Bases 3/4.3.7.8, be revised to support implementation of a modification designed to change the Main Control Room (MCR) high toxic chemical alarm logic, thereby reducing the number of false high toxic chemical concentration alarms received by the MCR. Subsequently, the NRC has issued TS amendments for LGS, Units 1 and 2, that affected the TS pages originally submitted by our August 25, 1993 letter. Therefore, in order to continue with processing this TS Change Request, we are resubmitting the following TS pages to include the proposed changes delineated in TS Change Request No. 93-11-0, and to reflect the changes associated with the recently issued TS amendments.

Unit 1

3/4 3-91  
B 3/4 3-6  
B 3/4 3-7

Unit 2

3/4 3-91  
B 3/4 3-6  
B 3/4 3-7

The proposed changes to the TS are indicated by a vertical bar in the margin of the affected TS page. As a result of the recently issued TS amendments, and to accommodate the changes related to TS Change Request No. 93-11-0, it was necessary to relocate portions of Bases Section 3/4.3.7.9 from page B 3/4 3-6 to page B 3/4 3-7. The attachment to this letter provides the revised TS pages for LGS, Units 1 and 2. This information is being submitted under affirmation, and the required affidavit is enclosed.
