Proposed Technical Specification Changes to Relocate
Specific Boron Concentration Values to the Core Operating
Limits Report; Supplemental Information

By letter dated May 24, 1994, Duke Power Company submitted proposed Technical Specification changes for McGuire and Catawba Nuclear Stations which would relocate values of required boron concentrations, in the spent fuel pool and the refueling canal, from Technical Specifications to the Core Operating Limits Report. NRC review of the proposed changes has indicated that additional information is required to complete their review. Accordingly, attached is the additional information requested in a July 29, 1994 telecon between T. L. Huang and R. E. Martin of the NRC, and S. A. Gewehr of Duke.

If you require additional information, please call Scott Gewehr at (704) 382-7581.
